Immediate Release 4 October 2007

Jetion Holdings Limited

("Jetion" or the "Company")

European Product Accreditation

Jetion Holdings Limited (AIM:JHL), the manufacturer of solar cells and modules, announces that it has received key product accreditation for the global sale of its solar module products.

TUV* accreditation is a major achievement, as it provides additional quality and performance validation for Jetion's products, which will give important leverage in its key European market.

Currently Jetion exports over 70% of production, either directly or through intermediaries, into mainly European markets - and TUV accreditation will enable more direct sales to end customers, thus capturing more of the solar cell value chain which in turn will further improve margins.

Commenting on Jetion's TUV approval, Dipesh Shah, Chairman said:

"TUV approval will be a key lever for the Company to increase direct sales of our products into major growth regions for solar power. The Company is rapidly expanding its production as well as moving into wafer slicing and module manufacture - both key to capturing more value.

"Jetion is well placed to increase our product penetration with this accreditation and we are confident of achieving this in the short term."
