Trading Update

Jetion Solar Holdings (AIM:JHL), the manufacturer of high quality solar cells and modules, announces a trading update following the financial year end on 31 December 2009.

The Board is pleased to announce that net profit for the year ended 31 December 2009 will be significantly ahead of current market forecasts of US\$11.7m. Four key factors have improved profitability - the growing customer base has increased sales faster than expected, improved operating efficiency has reduced production costs, the price of silicon wafers remains soft and we continue to improve the optimisation of our supply chain.

Commenting on trading, Chairman Gabriel Kow said:

"It is very pleasing to see the marked upturn in profitability and we are hopeful this will continue into Q1 this year. The strong finish to 2009 is testimony to Alina Xu's appointment as CEO and her inspiration to the senior management team"
